Kerrville ISD – Value Added Model

What is a *Value Added Model*?

A *Value Added Model* is a process to improve student success based on two fundamental principles.

What are “Value Added” Principles?

Principle #1

State administered examinations should be used to improve individual student academic success.

What are “Value Added” Principles?

Principle #2

Student academic success can be compared from year to year to determine:

- Academic growth of a student in meeting state standards
- Specific interventions based on a needs assessment to improve individual student success

Interpretive Analysis (Confidence Level Relatively High)

- CONCERN LEVEL LOW - Answer there's a probability student could slip backward
- NOTE: Regression to mean is now likely negative, adding age
- Scale Score Performance Prediction: POSITIVE GROWTH (DOCS) (Consider Study Score first)
- Refer to school response to Scenario #3
