Message:

I trust that if this “redistricting” saga pulls through, life will get much worse for Texans. Constituents are already ignored as is, and it seems- according to the planned layout most of the committee has for Texas- this will only worsen as many of you wish to silence voices so that it becomes easier to ignore it. This is unnecessary, and many of you constituents believe so as well. Instead of focusing on raising the minimum wage or making rent affordable again, you wish to exercise congressional power which stems from the people last I remembered, because you know the senate is supposed to represent the people, to make life harder for many who are already struggling. This way you can maximize political power. As a Texan resident, this plea might fall on deaf ears per usual but please reconsider and prevent this from occurring. It is not worth the loss of trust many will have in you, and eventually, your seats.
