Message:

No to redistricting. This is an attack on the fundamentals of our democracy. Living in Bell county, where the city of Temple was split down the middle, it is evident to me that these lines are drawn with racial biased. This new map directly cuts off the most populated area of black and brown voters in Temple. Aside from that, this entire concept is literally the death of democracy. Just because the party in power can, or thinks they can, does that mean we should. I am not going to appeal to logic or legality at this point, but instead to literally just your morals and ethics. This is wrong, and it doesn't take the interest of the voters into consideration. What it does do is directly violate our voting rights, dilutes our voices, and disintegrates any hope left in our current governmental system. As our elected officials, you have an obligation to us, to your constituents, the people who voted you in, and I ask that we fight for democracy and not bow down to demands of Trump and Abbott.
