Message:

Why do you expect us to support the erosion of our democracy?

The redistricting proposed only takes away representation, representation that we once held core to our ideals. We can and we should stand by our ideals, and not resort to disfranchising voters to push our own personal or corporate agendas.

If the great people of Texas decide that they want new representation next election then that should be their choice. Because it is our founding belief that our representation is an unalienable right that was granted to us by the constitution.

Support policy for the people and the people will support you.

But it is the people who must be the ones making that choice.
