Message:

These districts were drawn and accepted by the legislature when the census was completed. There is no new information that has come to light that they did not have when drawing These boundaries. This is illegal to redistrict outside of a new census. If These boundaries were not drawn legally in 2021, why did they accept them?

This is purely an attempt to disenfranchise people and take away their representation. I am in one of these boundaries, which is a brand new district. If they could not draw them properly before, they don't get a redo until the next census.
