Message:

It is important to know that all but one of the 13 congressional districts in Texas represented by a Democrat has a majority minority population, including all four of the districts in Houston.

And in all 13 of those districts, minority voters elect their candidate of choice. The Legislature cannot dismantle any of the districts currently represented by Democrats without diluting the voting strength of minority communities.

Texans deserve to have equal representation in Congress. This continued assault on the voting integrity in our state has to stop. Our governor should be concerned about the future of all Texans not party politics. It is shameful. The last attempt to destroy the rights of others is still being challenged in court. When will they do what's right. They are those who continue this rhetoric of separation by party. It is time for Texans to get leaders who are focused on building an us society. One that realizes that this state can be greater if we move together as one society and not one focused on they. This separatist ideology must cease. It will only destroy our democracy. Stop the politics and be true politicians who build society and not destroy it. Build communities and stop deliberately destroying them. We see you and we vote. We will really vote in 2026.
