Message:

Your constituents have repeatedly stated that we do not want a new congressional map. Gerrymandering is wrong and will always be wrong. The rules can not be bent to fit the whim of anyone's request. There are other matters that are more important. This issue with the maps is not serving Texas or its people. Follow the rules that have already been established and revisit this after the census...just like you did for the current map that is in place. Any politician that is in favor of this map is blatantly disregarding the will of the people of Texas and thereby is not fit to serve or represent the people of Texas.
