Message:

It's like we have to talk to you all like children. It's starting to get ridiculous that we are having to have conversations about this. You are all sitting down and taking it up the ass. You are allowing fascism to consume and kill your constituents. You are all deadbeats with no backbone, an embarrassment to the people of Texas and the United States of America. Trust you will be dealt with whether you like it or not. I promise you won't like it. The people will rise regardless and all that money you're prioritizing over the people of Texas will soon be a figment of your imaginations. So, take your vacations, fund your kids and grandkids education as long as you can because it will be a day where you hit rock bottom. I and many others will make it happen you freaks.
