Message:

We are not due for new maps until after the 2030 census.

There is no reason to redraw the maps at this time. The proposed map would severely alter the representation in the state, leaving many constituents without a voice. This undermines the principle of fair representation, diluting the voting power of certain demographic groups, leading to unequal political influence and potential lack of accountability for elected officials. We need to be focusing on brining communities together, not causing further polarization and extremism. Each voice, each vote should be equally represented, and gerrymandered maps only serve those clinging to power.
