Message:

Redistricting mid decade is an affront to our democracy. But more so that dictator Trump has Abbott in his pocket and Abbott doesn't have the courage to say no. Republicans say this is the will of the people, but it is NOT the will of the people it is the will of our authoritarian president who knows he will lose the house in 2026. Texas is a majority minority state and we do not have representation for our underserved populations. What the Republicans are proposing is gerrymandering to the extreme. Our map is already gerrymandered and if you take away Veronica Escobar from the majority of El Paso, you are doing a disservice to our community. It is not my will, nor the will of the majority of Texans that this map goes through and I support the Democrats fighting you with whatever measures they can do to stop this madness. And I'd like to know the facts if Trump's team drew this map. If that is true, it is illegal and he needs to be impeached and removed from office
