Message:

The Texas redistricting bill undermines fair representation by diluting the voting power of communities of color, despite their population growth. It prioritizes partisan advantage over democratic integrity, violating the principles of equal representation and potentially contravening the Voting Rights Act. This gerrymandering entrenches political power rather than reflecting the will of the people. This is absolutely a ridiculous power grab and is so blatantly illegal in how this is moving forward and is setting the stage for blue states to retaliate to do the same
