Message:

My name is Stephanie Neverdowski, and I live in congressional district 22. My community is diverse and inclusive, unlike my representation, which is all older white men. It is time to end gerrymandering based on race and let the people vote in fair and un-rigged elections. I strongly oppose this rushed mid-decade redistricting process because no matter how loudly they say it is not discriminatory, it very much is. In addition, the process is not transparent at all. Where are the maps? Why are you so afraid to follow due process and release them ahead of time? What are you hiding? The truth is they are drawn with racial bias and with a goal of reducing any representatives of color that currently represent these people. If you want support from everyone in these districts, follow the rules and make the process transparent. RELEASE THE MAPS!! Show us what you are proposing. Let Texas communities be involved in who will represent them from the great state of Texas!
