Message:

I am disappointed in the decision of Texas' governor to toady to the requests of a man who would rule North America. This shows a lack of understanding of the governing principles of this nation. You see, the People elect representatives, who will vote in their best interest (represent them). Real elections are not bought so politicians and their supporters can benefit. They give every qualified voter a voice in the management of the city, state, and nation.

The policies of the current administration are dangerous. They threaten the physical AND DEMOCRATIC health of the nation. Of no consequence to insulated politicians, they have divided my beloved country, and promote hate, conflict, and destruction for the benefit of a few.

Do not buy into this destructive mindset. Stand up to the authoritarian narcissist who would be king. Do your jobs and represent the People.
