Affirm public info: I agree

Regarding: Congressional

Message:

I oppose the passage of a bill to implement mid-decade redistricting in Texas. Traditionally, and for good reason, redistricting is accomplished after the collection of population data has been analyzed. The goal of redistricting is to adequately provide representation to all residents of Texas based upon population and the increase/decrease of population, geographically. This impromptu decision to redistrict is at the behest of the White House and its proxy, the DOJ. This is a political maneuver that has nothing to do with providing all Texans (both rural and urban) with proper representation. This request, using Texas as its pawn, is to try and provide the president with five additional Republicans for his purposes. The Texas Legislature works for Texans, not for the federal government. This redistricting does not serve your constituents. If moral and ethical behaviors prevail in the Senate, this effort will be abandoned, and the focus of the Special Session will be dedicated to helping Hill Country residents with disaster relief. It may also be important to discuss future disaster response if FEMA is dismantled.

I do support the creation of an independent, non-partisan redistricting commission to handle the next scheduled redistricting effort after the 2030 census. Thank you.
