Message:

Governor Abbott's decision to follow Trump's push for redistricting at the expense of addressing urgent issues like flood relief seems misaligned with the priorities of the Texas people. Also in the midst of the Epstein scandal, why are Texans expected to carry water for a figure who may drag the entire party down with him? We've been asking for those files for years and now they're monkeying around with the files. I urge you to consider whether this ask for Trump aligns with the values of limited government and prioritizing what's truly best for Texas voters. You are potentially risking political suicide by doing this man's bidding. Step away from this issue lest you go down with him and lose your majority in the Texas Lege. Focus on cleaning your own Texas House before cleaning his. You do not want this muck on your shoe when going into an election season.
